JEEVA RAVICHANDRAN

Java Developer

jeevaravichandran007@gmail.com | 9342847572 | linkedin.com/in/jeeva-ravichandran | github.com/jeevaravichandran

PROFESSIONAL SUMMARY

Aspiring Java Backend Developer with hands-on experience building RESTful APIs and database-driven applications using Java, Spring Boot, Hibernate, and MySQL. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms. Skilled in designing secure, scalable backend systems and eager to contribute to built a fast-paced team as a Java Developer.

TECHNICAL SKILL

- Programming Languages: Java(Core Java, OOP, Collections, Exception Handling, Multithreading), SQL.
- Frameworks & Libraries: Spring Boot, Spring Data JPA, Spring Security, Hibernate, JWT Authentication, RESTful APIs, JDBC.
- Database : MySQL - Schema Design, Joins, Indexing, CRUD Operations.
- Tools & Platforms: Git, GitHub, Maven, Postman, Swagger/OpenAPI, Intellj IDEA, Eclipse.
- Core CS Concepts : Data Structures & Algorithms(DSA), OOP Principles, Problem Solving.
- Frontend : HTML, CSS, JavaScript.

PROJECT

Todo Management Application - Spring Boot REST API
Java | Spring Boot | Spring Security | JWT | Spring Data JPA | Hibernate | MySQL | Swagger | Lombok | Maven

- Designed and developed 10+ RESTful CRUD APIs for Todo Management, reducing manual data-handling steps through clean Spring Boot architecture
- Implemented secure authentication and role-based authorization using Spring Security and JWT, protecting all RESTful API endpoints from unauthorized access.
- Integrated Spring Data JPA (Hibernate) with MySQL for persistent storage, applying ORM mapping for efficient entity relationships.
- Documented and Tested all APIs using Swagger/OpenAPI and Postman.
- Used Maven for dependency management and Lombok to reduce boilerplate code.

Bank Management System - Core Java & JDBC
Java | OOP | Exception Handling | JDBC | MySQL

- Built a console-based Bank Management System application simulating real-world operations including account creation, deposits, withdrawals, and transactions history.
- Applied OOP principles and exception handling for application reliablity and data integrity.
- Implemented JDBC-based CRUD Operations with MySQL for persistent, multi-user account and transaction data storage.
